

2011-2012 Black Hills Energy Colorado Evaporative Cooling Qualifications

The following manufactures and equipment models are eligible for rebates under the Black Hills Energy Residential Evaporator Cooling Rebates. Purchasing an evaporative cooler not on this list may make you ineligible for a rebate. This list is subject to change at any time. We will only rebate according to the current approved list.

Criteria Eligibility: To qualify for a \$200 rebate or the purchase price of the evaporative cooling unit, whichever is less, equipment must be new and have a minimum Industry Standard Rated (ISR) airflow of 2,500 CFM. The unit must be a permanently installed direct, indirect or two-stage evaporative cooling unit.
