

TIME OF DAY RATE

Take control of your energy costs.

Black Hills Energy has implemented an electric rate, called the Time-of-Day (TOD) rate, to give you more control over your electric use and provide opportunities to save money on your bill through peak and non-peak energy pricing. Under the Time-of-Day rate, *when* you use electricity is just as important as the *amount* used, because the price charged per kilowatt-hour depends on the time of day that electricity is used.

Residential TOD Rate	Small Commercial TOD Rate	Large Commercial EV TOD Rate	Large Commercial EV TOD Rate (Non-Demand)
<ul style="list-style-type: none"> Residential customers will be charged a Time-of-Day "whole house" rate, meaning it applies to all the electricity used at the home. Customers will see a flat \$8.77 charge on their bill, same as they currently do, and then a fee for the amount of electricity used, based on the on- and off-peak rate per kilowatt-hour used. On-peak hours (and rates) are from 5 p.m. to 8 p.m. on weekdays and non-holidays. Off-peak hours (and lower rates) are during all other times. Residential customers participating in the Time-of-Day rate will receive a new electric meter. Terms and conditions apply. 	<ul style="list-style-type: none"> Small commercial (demand less than 50 kW), government, non-profit and multi-unit dwelling customers will only be charged TOD rates for the energy used for the EV charger. Customers will see a fee for the amount of electricity used for the charger, based on the TOD on- and off-peak energy pricing. On-peak charging hours (and rates) are from 5 p.m. to 8 p.m. on weekdays and non-holidays. Off-peak hours (and lower rates) are during all other times. Terms and conditions apply. 	<ul style="list-style-type: none"> Large commercial and industrial customers (demand between 50 kW and 1,400 kW) will only be charged TOD rates for the energy used for the EV charger. Customers must have a dedicated meter installed for EV charging. Electricity usage for EV charging and non-EV charging will be reflected on one monthly bill. Customers will see a \$7.62* per kW demand charge for the highest average kW load measured during 15 consecutive minutes of maximum use during the billing period, and then a fee for the amount of electricity used for the charger, based on the TOD on- and off-peak energy pricing. *On the EV TOD rate, the demand charge is roughly one-quarter of the normal demand charge. On-peak charging hours (and rates) are from 5 p.m. to 8 p.m. on weekdays and non-holidays. Off-peak hours (and lower rates) are during all other times. Terms and conditions apply. 	<ul style="list-style-type: none"> Large commercial and industrial customers (demand between 50 kW and 1,400 kW) will only be charged TOD rates for the energy used for the EV charger. Customers must have a dedicated meter installed for EV charging. Electricity usage for EV charging and non-EV charging will be reflected on one monthly bill. Customers will not be charged a per kW demand charge. For public fast charging, only. On-peak charging hours (and rates) are from 5 p.m. to 8 p.m. on weekdays and non-holidays. Off-peak hours (and lower rates) are during all other times. Terms and conditions apply.

TIME OF DAY RATE

Take control of your energy costs.

Time-of-Day (TOD) rate information:

Time-of-Day Rates and Customer Charge	Residential TOD*	Small Commercial TOD	Large Commercial EV	Large Commercial EV (Non-demand)
Monthly Customer Charge	\$8.77	\$11.39	\$64.00	\$64.00
Summer On-Peak Energy Charge (\$/kWh)	\$0.24034	0.20234	\$0.79050	\$1.07439
Summer Off-Peak Energy Charge (\$/kWh)	\$0.12017	\$0.10117	\$0.26350	\$0.35813
Non-Summer On-Peak Energy Charge (\$/kWh)	\$0.24034	\$0.20234	\$0.52700	\$0.71626
Non-Summer Off-Peak Energy Charge (\$/kWh)	\$0.12017	\$0.10117	\$0.26350	\$0.35813
Demand Charge (\$/kW)	N/A	N/A	\$7.62	N/A

Time-of-Day Specifications**	Residential TOD	Small Commercial TOD	Large Commercial EV	Large Commercial EV (Non-demand)
Summer	N/A	N/A	June 1 - Sept. 30	June 1 - Sept. 30
Non-Summer	N/A	N/A	Oct. 1 - May 31	Oct. 1 - May 31
On-Peak Hours	5-8 p.m.	5-8 p.m.	5-8 p.m.	5-8 p.m.
On-Peak Period	Mon.-Fri., excluding holidays***	Mon.-Fri., excluding holidays***	Mon.-Fri., excluding holidays***	Mon.-Fri., excluding holidays***

*The Residential EV rate is available for all residential customers receiving electric service from Black Hills Energy in Colorado. The rate is a requirement for residential customers participating in the Ready EV wiring rebate program who don't participate in the EVolved Charging incentive program. The rate will be applied as a "whole house" rate, where a customer on this rate will transition the entire load of the residential property from the current residential rate to the Residential EV rate. Residential customers may opt out of the Residential EV rate after 12 months of participation. The Residential EV rate is optional for income-qualified customers participating in the Ready EV charger and wiring rebate program.

**Residential EV and Small Commercial TOD rates do not have a summer/non-summer distinction, therefore on-peak and off-peak energy charges are consistent year-round. Large commercial EV rates are intended for EV charging only. Separate meters will be required for large commercial charging stations.

***Holidays are defined as New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Manage your energy use:

Log into your Black Hills Energy account to see your previous day's electricity usage ("whole house" electricity for residential customers) and EV charging usage for small business and large commercial usage during on- and off-peak hours. This helps you understand your energy consumption habits so you can make adjustments to take advantage of lower, off-peak energy pricing. Please note that if you don't adjust your energy use, your bills may go up, not down, due to the higher cost of energy during on-peak times.
