

Choice Gas program
P.O. Box 1158
Rapid City, SD 57709

In this packet, you'll find all the materials you need to choose your natural gas commodity supplier and price option for 2026.

Dear Choice Gas Customer,

Welcome to the 2026 Choice Gas program! The Choice Gas program gives you the opportunity to choose a natural gas commodity supplier and price option that best suits your needs. Regardless of the supplier you select, Black Hills Energy will maintain your local natural gas system, read the meters, send bills and answer questions. The distribution charge on your bill pays for these services.

What's enclosed in this packet?

1. A personalized selection form with your control number, selection instructions and postage-paid reply envelope.
2. A "Choice Gas Quick Start Guide" that provides a quick overview of the options and steps required to make a supplier selection.

Choice Gas program features

Control number retrieval

The newest way for customers with a Black Hills Energy account to access their control number is to log in, select Programs & Services from the Dashboard, and click the Choice Gas card. If you're eligible to make a selection, your control number will be displayed and you will only need to enter the 5-digit confirmation code provided you by your chosen supplier.

You'll need your account number to get your control number through one of the following methods:

- Visit choicegas.com. Click the button applicable to the state and program specific to your enrollment. The next page gives the option to obtain your control number. Click on the link called [here](#) and on the next screen enter your account number and choose the method by which you want to receive your verification code. Check email or text message as the method by which to receive your verification code and your control number will be provided.

***This two-factor authentication process is successful only if the account holder's email or phone number have been provided to Black Hills Energy for the account.**

- You may also contact the call center at 888-890-5554 and a representative can assist you.

Multi-year selection option

You may be offered the opportunity to select a natural gas commodity Supplier and natural gas commodity price option for a multi-year term. Residential customers may select a term of up to two years. Commercial and industrial customers may select a term of up to three years.

If you selected a multi-year term, during the term of your selection, you will not:

- Receive an annual selection packet
- Receive Supplier marketing contact
- Be eligible to make another selection

Multi-year selection terms are non-transferable, due to being customer and service address specific. This means if you move during the term of a multi-year selection, you'll be eligible to make a selection at your new service address during the next annual Choice Gas program selection period. Similarly, if you move into a service address whose previous tenant made a multi-year selection, you will be eligible to make a selection during the next annual Choice Gas program selection period.

Check with your natural gas commodity Supplier regarding multi-year term offers, the applicable terms and conditions, and/or any early termination charges or fees that may apply.

Supplier marketing and customer contact information

The natural gas market can be volatile, with available prices changing frequently during the selection period. To give you timely information to help you make the Choice Gas natural gas commodity Supplier selection that best suits your needs, the participating natural gas commodity Suppliers may call, text or email you to share their individual natural gas commodity price and price option offerings. Black Hills Energy, the Choice Gas Program Administrator, provides the Choice Gas program participating natural gas commodity Suppliers with the telephone number and email address you provided for your Black Hills Nebraska Gas, LLC utility account.

Although we want you to have the opportunity to receive this additional information from all of the natural gas commodity Suppliers we also understand that phone calls, texts and emails may be burdensome. Each natural gas commodity Supplier is limited on the frequency, type and number of contacts made to you. If you don't want to receive these communications, please ask to be removed from their call list or opt out of their email communications. You may also contact the Utility call center at 877-245-3506 to request Choice Gas program participating natural gas commodity Suppliers discontinue all marketing communication attempts to you. **Within 24 hours of completing a successful selection for your service address, you shouldn't receive any further contact from natural gas commodity Suppliers.**

What do I need to do?

Select your natural gas commodity supplier and price option for the 2026 Choice Gas program year. There are five ways to make your selection: 1) online at choicegas.com or by logging in to your Black Hills Energy account 2) by phone @ 877-245-3506 3) through your supplier 4) by mail 5) by automatic rollover. Instructions on each submission method are found on the back of the selection form. Check with your supplier as to how long the given price for a price option's confirmation code will be valid. The first valid selection you submit will be considered final. **The Choice Gas program selection period begins Thursday, April 2, 2026, and ends Wednesday, April 22, 2026.** You must submit your selection on or before the end of the selection period or you will automatically roll over to your current supplier and price option. **You must sign your mailed selection form for it to be considered valid.**

What if I choose to do nothing?

By doing nothing, you invoke the automatic rollover selection, which results in the continuation of your natural gas commodity price option with the same supplier, however the final price will be determined by the supplier 15 days after the selection period ends and may be a higher price than prices offered during the annual selection period. The advantages of actively making your selection during the Annual Selection Period are: 1) immediate knowledge of the price you will pay beginning June 1st 2) no more marketing communications from suppliers when your selection is made 3) variety of prices and options available to choose from during the Annual Selection Period versus the final price assigned by your supplier after the Annual Selection Period ends.

Key sources of information for the 2026 Choice Gas program

- Websites and phone numbers for each supplier offer additional information and price options. See below or refer to the enclosed selection form.
- A Choice Gas guidebook is available at choicegas.com.
