

2024 RESIDENTIAL NEW CONSTRUCTION PROGRAM

COLORADO: RESIDENTIAL NATURAL GAS CUSTOMERS

Build an energy efficient home and receive rebates by following one of two paths offered by Black Hills Energy.

1. Performance Path: Builders must meet a standard of 10% above local code (see below).

-or-

2. Prescriptive Standard: Builders may install measures from a selected set of energy efficiency measures (see page 2).

Rebate Checklist

Get your rebate check faster by checking off these easy steps before mailing your application form. Incomplete applications may be delayed

- Completely fill out application (mandatory)**
- Review Terms and Conditions and sign and date application
- Attach additional documents as required. Call Black Hills Energy for details at 888-567-0799
- Make and retain copies of all documents and applications
- Send all documents to correct address listed on application (sending application to billing address will delay your rebate)

Terms And Conditions

General Eligibility

1. May be a single or multifamily home up to 5 years old and must be a natural gas customer located in Colorado.
2. **Homes must be completed between Jan. 1, 2024 and Dec. 31, 2024. Applications for work done in 2024 must be received by Jan. 15, 2025.**
3. Space heating systems must use natural gas, be the primary fuel source and for the Prescriptive Path meet the efficiency requirements established for other Black Hills Energy programs (reference the table on page 2). For Performance Path the builder needs to show savings 10 percent above local code, verified by a HERS rating.
4. Where applicable, energy efficiency ratings must comply with those listed in the Air-Conditioning, Heating, and Refrigeration Institute (AHRI) directory found at www.ahridirectory.org. All space heating equipment needs to bear the AHRI certified mark. All water heaters must either include AHRI certification or be listed as an ENERGY STAR qualified equipment.
5. Black Hills Energy must provide the main heat source fuel. If Black Hills Energy does not provide the main heat source fuel the home would not be eligible for a rebate.
6. Applications will be processed on a first-come, first-served basis. The program will end when the budget is depleted. Funds are limited.
7. This program is subject to regulatory rules and orders. Black Hills Energy reserves the right to change or to end any portion of this program without notice.

Black Hills Energy's Recommended Performance Path

The Performance Path allows builders full flexibility to determine the natural gas savings measure they would like to install. **The only requirement of the Performance Path is that builders are able to verify that the home has natural gas savings 10% above the local code as verified by a HERS rating.** The total incentive in the Performance Path is \$1,000 per qualifying home.

Requirement (HERS Rating Mandatory)	Eligible Measures/Incentive
10% above the local code as shown with a Fuel Summary Report Comparison or 10% above the local code as shown with a qualifying HERS Score (see table below)	Incentive \$1,000
HERS rating Incentive \$100 (paid directly to Rater)	

Local Code	Rating Type	HERS Score Requirement
IECC 2006	HERS	≤ 66
IECC 2009	HERS	≤ 64
PIKES PEAK - 2023	HERS	≤ 49
IECC 2012	HERS	≤ 57
IECC 2015	2015 ERI	≤ 49
IECC 2018	2018 ERI	≤ 54
IECC 2021	2021 ERI	≤ 49

Black Hills Energy's Recommended Prescriptive Path

Qualify for a rebate by meeting the requirements listed below. The total incentive depends on the measures selected.

NOTE: A HERS rating or invoice must confirm all equipment installed.
