

2023 Indoor Agriculture Program

Colorado: Commercial and Industrial Electric Customers

Black Hills Energy offers Colorado customers with commercial indoor-agricultural and cannabis-related businesses rebates for energy efficient equipment and projects. Qualifying customers will receive a technical energy assessment and a customized proposal on potential energy savings through eligible measure upgrades.

A representative of Black Hills Energy will work with the customer to complete the following:

- Connect the customer with qualified horticulture-specific product/service contractors
- Verify the measures are installed
- Complete and submit paperwork and documentation

REBATES ARE THE LESSER OF:

- 50% of the incremental project cost
- OR
- \$ per kWh saved based on project size

Incentives are capped at one-third of the total program incentives per facility for a given program year. Funding for these rebates is limited. Applications will be processed on a first-come, first-serve basis.

EXAMPLE MEASURES

- HVAC commissioning and replacement
- Commercial insulation upgrades
- High efficiency fans replacement
- Dehumidification system installations
- Pump system upgrades
- Motor replacements

INCENTIVE \$ PER kWh SAVINGS

kWh Savings	Rebate/kWh
0 - 30,000	\$0.30
30,001 - 100,000	\$0.25
100,001 - 250,000	\$0.20
>250,000	\$0.15
