

2019 Compressed Air Audit Program

Colorado: Commercial and Industrial Customers

Black Hills is encouraging commercial and industrial facilities to reduce their compressed air leaks. The Compressed Air Program helps customers address inefficiencies the compressed air systems, encourage the repair of existing systems and purchase efficient options for new and replacement systems.

The program has two components:

- **Prescriptive Rebates** for the most common high-efficiency options such as no-loss air drains, cycling dryers, mist eliminators and dew point demand controls.
- **Study Rebates** for compressed air studies that help customers identify efficiency opportunities from fixing leaks as well as from redesign or replacement of system components. The customer must repair at least 50% of the air loss due to leaks as identified by the study. Only customers with equipment with at least 50 HP are eligible to receive a study.

Customer Information

(To be completed by customer)

Account Number

(Located in upper right-hand corner of Black Hills Energy electric bill)

PRESCRIPTIVE INCENTIVES	
Eligible Measure	Incentive per Measure
VSD Air Compressor	\$1,000
No Air Loss Drain	\$300
Cycling Dryer	\$430
Mist Eliminator	\$1,500
Dew Point Demand Controls	\$1,000

STUDY INCENTIVES	
Horsepower Levels	Study Finding
50 < 100 HP	100% of study costs, up to \$2,500
100 HP+	75% of study costs, up to \$15,000

Pre-approval Checklist

Get your project pre-approved faster by checking off these easy steps.

- Identify energy efficiency opportunities within your organization
- Submit project on line or by mail
- Completely fill out application (mandatory)
- Provide in-depth description of existing conditions and proposed project
- Provide manufacturer's equipment cut sheets
- Provide project energy savings calculations (if available)
- Provide project cost detail (if available)
- Provide estimated baseline equipment cost where available
- Make and retain copies for your records
- Send all documents to address on form
(sending application to billing address will delay your rebate)

Rebate Checklist

- Start your project after receiving your pre-approval letter
- Complete project installation
- Attach itemized invoices for equipment and labor, including date of installation
- Attach copy of pre-approval letter
- Make and retain copies of all documents
- Send all documents to address on back of form
(sending application to billing address will delay your rebate)

Existing & New Equipment Information

Please list all **NEW** equipment on this form so Black Hills Energy can calculate your rebate. Make a separate entry for each unit. If more than one measure is being applied for, please photocopy this form and attach with your application.

Certification

(To be completed by dealer/contractor/installer)

We certify that the indicated equipment was installed per the Terms and Conditions of this program at the address shown. All Terms and Conditions of the program have been met. We certify that all equipment information provided in the application is correct. Black Hills Energy reserves the right to inspect and verify any equipment before or after issuing rebates.

Post Installation Verification

An Itemized invoice indicating date of installation, dealer/contractor name, equipment manufacturer/model number and quantity must be provided. Black Hills Energy reserves the right to verify sales receipts, cancelled checks, and installations.

Tax Information

Rebates may be subject to federal and/or state income tax reporting. Applicant is responsible for contacting a qualified tax advisor to determine tax liability. Black Hills Energy is not responsible for any tax consequences of the rebate program.

Additional Information

- Please allow 7 to 10 business days to receive response on project application.
- Funding for these rebates is limited. Applications will be processed on a first-come, first-served basis. Additional information or assistance in completing your rebate application can be obtained by calling **800-426-5784**.

Disclaimer

Black Hills Energy does not guarantee that installation of equipment qualifying for rebates will result in reduced energy usage or demand, or in cost savings. The Customer will hold harmless Black Hills Energy and its officers, directors, shareholders, agents, employees, and representatives from all claims, liabilities, fines, interest, costs, expenses, and damages incurred by the Customer, for any damage, injury, death, loss or destruction of any kind to persons or property, to the extent the damage, injury, death, loss or destruction arises out of or is related to the conduct, negligence, willful misconduct, misrepresentation, breach of warranty or other breach of this rebate form on the part of Black Hills Energy.

Brief Description of Project

Describe project including details of energy savings measure(s) (i.e. Replace 70 hp 90% efficient motor with a 60 hp 93% efficient motor at a cost of \$500)

Terms and Conditions

General Eligibility

1. The Self-Direct Custom program will provide large commercial and industrial customers rebates to self-fund energy efficiency projects. Businesses who design, engineer, implement and commission qualifying projects can receive increased rebate levels to offset their costs of implementation. The dollar value of these rebates will be based on the amount of energy savings attained. Rebates are available to Black Hills Energy Colorado non-residential electric customers.
2. **All Self-Direct Custom projects require pre-approval before purchase and installation.**
3. **Purchase and installations must be completed between January 1, 2018 and December 31, 2018.** Applications for work done must be received by **January 31, 2019**.
4. Customers must have an aggregated peak demand at all meters greater than 1 MW in any single month and aggregated annual energy usage of 5,000 MWh. The customer of record must be the same for all meters aggregated to qualify for this program. Contact your Customer Representative to determine if you are eligible.
5. Multiple rebate applications for different measures may be submitted. Each individual measure will be evaluated on its own merits.
6. Similar measures that are proposed in different facilities or buildings will be evaluated separately.
7. Black Hills Energy reserves the right to adjust rebate amount based on final project costs as indicated on customer provided invoices.
8. Self-Direct Custom rebates are based on the cost difference (incremental cost) between standard and high efficiency equipment and systems, and the amount of energy saved. Rebates are calculated individually for each project. Projects must have an incremental payback of 1.0 year or longer. Customer savings will be based on the estimated reduction in billed energy and demand from current usage levels. Projects must have a societal benefit-to-cost ratio of 1.0 or higher. The incentive per kWh savings will be a sliding scale dependent upon the total project kWh savings. Total annual incentives will be calculated based on the cumulative annual kWh savings for all applications submitted by a customer during a program year.
9. Rebates for the Self-Direct Custom program will be paid in the form of utility bill credits against the DSMCA charge every month until the eligible project credit amount is exhausted. On the final month, the remaining bill credit will be trued up on the bill. Self-Direct rebates will have a 10% adder to the value over Custom rebates.
10. This program is subject to regulatory rules and orders. Black Hills Energy reserves the right to change or end any portion of this program without notice.
11. New equipment must be installed on the premises and must not be purchased for resale. Used/refurbished/repaired/rebuilt equipment does not qualify for this rebate.
